LOOKING FOR A FAST, ECONOMICAL WAY TO ORIENT AND LABEL AEROSOL CANS?

Our Can Orienter/Labeler orients the can and positions a wide range of labels (warning or ID labels, promotional coupons, UPC stickers) precisely to your specifications, automatically, and at speeds up to 250 cans per minute.

Prefer to print directly on the can? We can do that, too.

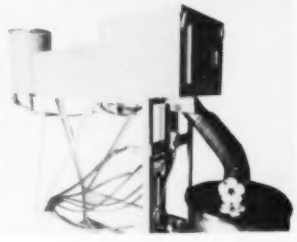
ORIENTER/LABELER

AND we can tape plastic extension tubes to can seams with our **TUBE TAPER**, without an operator, and at the same high speeds. Put those operators in a happier job while increasing your profits just like more than 50 of your competitors have done.

THEN we can take your reject cans, crush them into a 'wafer' and safely capture the contents for re-use or disposal, in single or multiple units.

CAN EVACUATOR

for reject can disposal and safe product recovery



You can make your personnel, stockholders, the safety officials and Susie Shields all happy by calling her at:

BEACON **404/692-6411**
PO Box 129 **Jasper GA 30143**
